4. First Aid Measures

General Advice: Consult a physician. Show this SDS to the doctor in attendance. Move out
of dangerous area.
If inhaled: If inhaled, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.
In case of skin contact: Wash with soap and plenty water. Consult a physician
In case of eye contact: Rinse thoroughly with plenty water for at least 15 minutes and consult a physician.
If swallowed: DO NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

5. **Firefighting Measures**
   Extinguishing Media: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
   Special Hazards arising from the substance or mixture: Carbon oxides.
   Advice for firefighters: Wear self-contained breathing apparatus for firefighting if necessary.
   Further Information: Use water spray to cool unopened containers.

6. **Accidental Release Measures**
   Personal precautions, protective equipment and emergency procedures: Use personal protective equipment. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.
   Environmental precautions: Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
   Methods and materials for containment and cleaning up: Contain spillage and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in a container for disposal according to local regulations.
   For Disposal see section 13

7. **Handling and Storage**
   Precautions for safe handling: Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Use explosion-proof equipment. Keep away from sources of ignition. No smoking. Take care to prevent the buildup of electrostatic charge.
   Conditions for safe storage, including any incompatibilities: Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

Engineering Controls: Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of the workday.

Eye/Face Protection: Face shield and safety glasses. Use equipment for eye protection tested and approved under appropriate government standards, e.g. NIOSH (US) or EN (EU)

Skin Protection: Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Body Protection: Wear impervious clothing. Flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Respiratory Protection: Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type AXBEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator.

Control of Environmental Exposure: Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
